

2023-2024 OSSEF MS-EZ Rules Project Summary Form

All sections of this form must be completed **AFTER**
the MS-EZ project has been completed.

You must display a completed copy of this form at your OSSEF project table.

Each student on a project must have submitted a completed and fully-signed Research Plan & Pre-Approval Form BEFORE experimentation.

OSSEF MS-EZ PROJECT TITLE: _____

Student Acknowledgement(s): By submitting this Project Summary form, I (we) acknowledge that I (we) followed the approved methods and safety procedures described on my (our) OSSEF Research Plan and Pre-Approval Form, in order complete the project. I (we) certify that this project is the result of only my (or our team's) effort.

MS-EZ PROJECT TYPE:

_____ Individual Research Project _____ Team Research Project.

List name(s) of each student on this project.

1. _____

2. _____

3. _____

Only one OSSEF MS-EZ Project Summary Form should be submitted for team projects.

MS-EZ RESEARCH TYPE (select at least one of the below)

This project involved:

_____ Human Subjects

_____ Human or Animal Tissues

_____ Hazardous Chemicals, Activities, Devices

_____ Microorganisms

_____ Vertebrate Animals

_____ None of the Above

OSSEF MS-EZ PROJECT SUMMARY

Complete both the Project Results and Project Conclusions sections below based upon your completed MS-EZ project. Follow the provided prompts for each section.

PROJECT RESULTS: All data collected. Include tables and graphs used to display data. You will need to attach your tables and graphs rather than pasting them into this space.

PROJECT CONCLUSIONS. Explain if your research question/hypothesis/claim was supported; explain the applications of your research to your field of science/engineering and to our society/World. (~300 words)

Affiliated Fair SRC Approval: I certify that I reviewed the project summary above, as well as the preceding forms/approvals. I have read and understand the ISEF Rules and Guidelines. I agree that this project fits with the OSSEF MS-EZ guidelines. I approve this student to present the MS-EZ project as described in the above research plan and project summary, following the safety guidelines detailed, as appropriate.
